To Whom It May Concern,

This is a letter of recommendation for Bianca Orozco for a math teaching position. Bianca has been a temporary teacher at TUHS in mathematics this year. She has taught Algebra Readiness, Algebra, Math Analysis, and AP Statistics on our campus. During her time here at TUHS, she has been an active member of our Algebra Readiness and Algebra curriculum teams. Bianca has helped develop and implement lessons in those classes and has provided valuable feedback from those lessons. In my observations of Bianca, I have found her to be very helpful, level-headed, encouraging, and student- centered. She is a very dedicated, dependable, and caring person who is always willing to help both students and teachers. She definitely supports a learning environment where all students can succeed and has high expectations for all students. I strongly recommend Bianca for a math teaching position.

Sincerely,

A handwritten signature in black ink that reads "Angela Pendergrass" followed by a horizontal line.

Angela J. Pendergrass
